About HRPUB	
Horizon Research Publishing, USA (HRPUB) is a worldwide open access publisher serving the academic research and scientific communities by launching peer-reviewed journals covering a wide range of academic disciplines. As an international academic organization for researchers & scientists, we aim to provide researchers, writers, academic professors and students the most advanced research achievements in a broad range of areas, and to facilitate the academic exchange between them.

Manuscript Title:	The Paradigm of Antithesis and Harmony as the Dualism of Pattern Fundamental in Architecture of Residential Houses in Bali, Indonesia
Evaluation Report	
General Comments	The paper unveils the architectural, psychological, and philosophical bases of traditional Balinese dwellings. An equilibrium of material and spiritual bottom lines is surveyed and explained thoroughly, providing an overreaching potential in terms of history and - primarily - of both operational instructions for the development of the respective built environment and the positive and normative general theory of architecture. On the one hand, this potential is unique and deserves appreciation and exploitation, however, it rests only on the brink due to numerous shortcomings of the paper on the other hand.
Advantage & Disadvantage	The depth and diligence of the observations along with the expertise quality and detail of the analysis are the advantages of the paper that, nonetheless, lacks clarity, conciseness, and a clear structure of the message and at least essential grammatical correctness (in many sentences the predicate is missing, other sentences fail to express what the authors wanted to convey evidently). The survey, inductive and deductive reasoning are not embedded in the international state-of-the-art / not compared with international literature. Another shortcoming is the paucity of cases studied.
How to improve	The wording of the paper ought to be improved significantly in terms of clarity, conciseness, and the clear structure of the message together with essential grammatical correctness. The survey, inductive and deductive reasoning ought to be embedded in the international state-of-the-art / in a framework of international literature. The paucity of cases studied can be - perhaps - at least partly overcome by proving the studied cases as typical ones.

Evaluation Report	
General Comments	The paper is not very clear in some passages and also there are many repetitions
Advantage & Disadvantage	The contribution allows to know other forms of dwelling than the dominant models in the western world
How to improve	It would be better to reorganize the structure of the paper, avoiding continuous repetition in the paragraphs following the introduction i.e. the meanings of “utama” and “nista”. Furthermore, the presentation of the case study should be anticipated in the introductory part, instead of paragraph “materials and method”. Moreover, a general scheme of the organization of an existing village is missing, it would make easier to understand the general housing organization.
