Dear Prof. Mr I Nengah Sinarta,

Manuscript ID 17668 entitled "Spatial Analysis of Safety Factors Due to Rain Infiltration in the Buyan-Beratan Ancient Mountains" which you submitted to our Journal "International Review of Civil Engineering (IRECE)" has been reviewed. The comments of the reviewer(s) are included at the bottom of this email.

The reviewer(s) have recommended a MAJOR REVISION.

This is an opportunity for you to respond to their major concerns and to incorporate improvements in the paper according to their suggestions. It is also an opportunity for you to add new results. We normally only permit one major revision before an accept or reject decision is made. So please take the concerns of the reviewers seriously.

Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript within two weeks from the date of this email.

You should revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the colored text in red.

Once the revised manuscript is prepared, you can upload it and submit it through your on-line submission system.

In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to our Journal and I look forward to receiving your revision.

Sincerely,

Dr. K. M. Liew, Editor-in-Chief of International Review of Civil Engineering (IRECE)

Suggestion for improving the paper::

- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
- Please place your equations objects with "inline wrapping" text style, as depicted in the template of the journal.
- Some of figures in the paper are low quality pictures (see Figs. 1, 2, 6). The authors should enhance the dpi of these images to a higher print quality level.
- More references should support the analysis of the state of the art in the Review section. We strictly encourage the authors to visit our wide database of titles where they could search for recent references (2016-2018), at the page <http://www.praiseworthyprize.org/jsm/index.php?journal=index&page=search>
- The English needs more editing for grammatical errors and style.

Reviewer Responses:

The following remark should be still satisfied:

The Nomenclature section is incomplete; it should list all the symbols adopted in the manuscript (all the symbols used in the equations of the paper and all the acronyms present in the paper);

Moreover after all the above comments will be considered satisfied, in the acceptance e-mail it will be required to purchase the english editing service as for your request.

For any questions don't hesitate to contact us.
